# About

---

GFI Software is dedicated to making managing networks, security, and communication easier for small and medium businesses. With a focus on innovation and excellence, GFI Software offers enterprise-quality solutions specifically designed for SMBs. Trusted by over 40,000 customers worldwide, GFI solutions provide essential functionality to address everyday IT challenges. The software is easy to download, install, and configure, making it accessible to businesses worldwide.

# Solutions

## Security

### GFI KerioControl

All-in-one  
next-generation firewall  
and UTM

### GFI LanGuard

Patch management,  
vulnerability scanning,  
and network auditing

### GFI MailEssentials

Anti-spam and email  
security for mail servers

### GFI Archiver

Archiving emails, files,  
folders and calendar  
entries

## Communication

### GFI KerioConnect

Emails, calendars,  
contacts, tasks, chat and  
more

### GFI FaxMaker

Fax securely from  
anywhere using your  
computer, tablet or  
smartphone

### GFI FaxMaker Online

Internet-based faxing  
service

### GFI HelpDesk

Manage support issues  
with an all-in-one  
helpdesk

## Network

### GFI Exinda NetworkOrchestrator

Quality of experience for critical  
applications

### GFI ClearView

Prevent downtime while  
simplifying network management

### GFI SD-WAN

Multi-element WAN, traffic,  
management and prioritization

# GFI KerioConnect

---

GFI KerioConnect is an email server that keeps your communication safe and efficient. It comes with tools to protect against spam and viruses, filter attachments, and use secure protocols like SSL and S/MIME.

## Key Features:

- **Complete Communication Features:** send emails, chat instantly, share tasks, notes, and calendar events, and create shared folders.
- **Secure Correspondence:** stay protected with antivirus and antispam tools for your emails.
- **Automated Backup and Archive:** keep your emails and files safe and easily restore them if needed.
- **Stable and Reliable Server:** easy to manage, it runs smoothly without interruptions so you can focus on your work.
- **Easy to Set Up and Use:** works on different systems (Windows, macOS, Linux) and Internet protocols (IMAP, POP), with a simple web interface for setup.

# GFI KerioControl

---

GFI KerioControl is a next-generation firewall and unified threat management (UTM) solution designed for small and medium-sized businesses (SMBs) seeking comprehensive security.

## Key Features:

- **Automated Vulnerability Scans:** scan assets and applications for vulnerabilities automatically.
- **Detailed Reporting:** identify brand violations, scams, phishing sites, and more.
- **Flexible Deployment:** use in the cloud or as a managed service through certified partners.
- **Quick Response:** respond swiftly to critical threats with risk-based prioritization.
- **Virtual Private Network (VPN):** securely connect your offices and remote workers.

# GFI LanGuard

---

GFI LanGuard is your all-in-one solution for managing and maintaining endpoint protection across your network. It provides visibility into all network elements, helps assess potential vulnerabilities, and enables easy patch management and network auditing.

## Key Features:

- **Vulnerability Assessment:** scan and analyze your network, get recommendations, and support from leading vendors.
- **Update Management:** keep your systems updated, with automatic options available.
- **Network Audit:** receive a comprehensive report on devices, antivirus, firewall status, and weak passwords.
- **Network Status Bar:** monitor your network's status with ease.
- **Reporting Support:** generate reports to map network states and ensure compliance.

# GFI MailEssentials

---

GFI MailEssentials provides comprehensive email security with 14 anti-spam filters, 3 anti-virus engines, and malware scanning in one package.

## Key Features:

- **Multi-Engine Protection:** combines four leading antivirus engines for maximum security against email-borne threats.
- **Spam Filtering:** uses 14 advanced filters to block spam before it reaches inboxes, saving server space and time.
- **Anti-Spam Techniques:** blocks spoofed emails, stops emails from blacklisted DNSs or phishing sites, and detects emails from forged senders.
- **Compatibility and Control:** compatible with various email servers and setups, offering full control to IT admins.
- **User Control:** provides reports and access to quarantined emails, allowing users to manage their email preferences.
- **GenAI CoPilot:** enhances security with intelligent threat detection and content filtering adjustments.

# GFI Archiver

---

GFI Archiver provides a secure and central storage solution for your electronic communications, including emails, attachments, files, calendar entries, and faxes.

## Key Features:

- **Compliance and Auditing:** archive and manage electronic communications in a tamper-proof store to meet compliance requirements and assist with e-discovery and internal investigations.
- **Search and Retrieval:** quickly retrieve email history and files using desktop or mobile devices, with automatic indexing for faster search and retrieval.
- **Performance and Cost Savings:** separate archive from applications to save server space and improve performance, using single-instance storage (SIS) and compression to optimize storage resources.
- **Efficient Search and Compliance:** GFI Archiver CoPilot automates email tagging, enables natural language search, and ensures compliance.

# Reviews

**"The setup is very straightforward.  
It's literally just plug-and-play."**

PeerSpot.com

**"Easy to use and provides the ability  
to deliver customized solutions."**

Cristian Concha / Chief of Technical  
Department at IIA Ltda

**"A wakeup call in terms of what is  
happening on endpoint machines."**

Ted Mbugua / Security Engineer at CRAG
